# nauti cat 33

With the advent of the Nauticat 33, Siltala Yachts made a lasting impact in setting the trend for motorsailers bringing more and more comfort to family sailing throughout the world.

Now in its 18th year of production, the Nauticat 33 continues to surprise and delight all comers, both experienced yachtsmen and those venturing afloat for the very first time. The effortless operation, superb comfort, and careful arrangement of interiors making use of all available space to the best advantage has created a demand for this boat resulting in nearly 1,000 hulls so far.

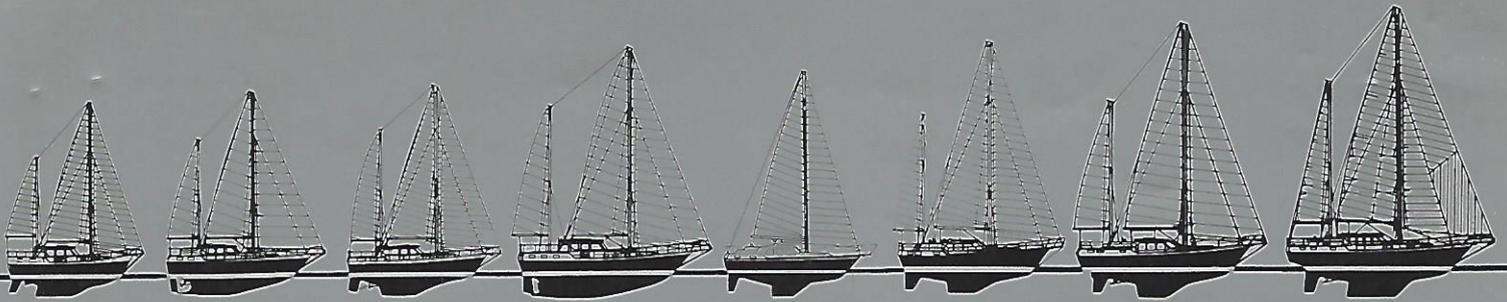

In addition to the original long keel version the Nauticat 33 is now also available with the fin and skeg underwater section and new rig resulting in improved performance under sail. This design is more suited to the experienced yachtsman looking for more versatility than the average motorsailer concept allows.
