**Broker's Comments:**

The Windy 40 Bora is a sublime piece of design and craftsmanship from Windy Boats AS. The Hans J. Johnsen hull is forgiving in a seaway, this example has the powerful 350HP engine option for strong but economical cruising performance, and has the classic

Windy white hull livery and clean white cockpit upholstery to set off the teak cockpit sole.

MOONDANCE is a two-owner from new example, with only light usage on her smooth new-generation diesels. The Windy 40 Bora is reputed to be the greatest sea hull ever built by Norway's Windy Boats. She is fast, lithe, strong as an ox and very, very pretty in the flesh. With the option to carry a tender in her garage, two sun-pads, a superb driving position and 6 berths available – this is a truly versatile fast sports cruiser.

**Construction:**

Windy are a product of traditional craftsmanship, enhanced with the aid of modern technology. The latest technological innovation is the Wintec hull concept, which gives improved performance, greater strength and reduced noise throughout the vessel.

The hull is reinforced with advanced multi axial glass fibre matting and Divinycell core. This allows a reduction in the boats weight of up to 20% whilst offering noticeably improved stability.

All the Windy models are CE-labelled. This means that Windy meets all the requirements laid down for quality control documentation and product liability within the EU. In the process of obtaining approval, the company has also introduced new methodologies, construction principles and more advanced construction production equipment, resulting in more cost – effective and quality oriented processes in – house. But above all, Windy is a “Boat Builder” and not a manufacturer of boats, a philosophy, which characterizes their production staff and all those within their distribution network.

**Construction Details:**
